

worldwide innovator in flexible liquid packaging

**FOR IMMEDIATE RELEASE**

***CDF exhibiting range of flexible packaging solutions at the ILMA Management Forum***

Plymouth, MA, March 5, 2013 - CDF Corporation, a leading manufacturer of [drum](#), [pail](#), [intermediate bulk container](#) and [bag in box liners](#) and [flexible packaging](#), will present Cheertainer® bag in box, Smart Pail™, IBC formfit liners and drum and pail liners at the Independent Lubricants Manufacturers Association's Management Forum.

The Independent Lubricants Manufacturers Association's Management Forum will be held April 18<sup>th</sup> through the 20<sup>th</sup> in Carlsbad, CA. The management forum is three days of networking, informative sessions, committee meetings and the opportunity for customers and suppliers to meet; over 300 attendees are anticipated.

CDF has a wide range of flexible products to satisfy the needs of product manufacturers and producers. CDF's liners for intermediate bulk containers, drums and pails provide outstanding performance in critical lubricant applications.

Our most popular IBC liner is the form-fit liner. [Formfit liners](#) are manufactured to form fit the internal shape of your intermediate bulk container. Form-fit IBC (cube-shaped) liners provide high performance in critical applications, such as top-fill applications using a bridge or automated filler; containers with no access doors for placing a liner at the bottom; high speed fills and viscous products that would get caught in the folds of pillow-shaped liners.

The [Smart Pail](#) is an environment-friendly alternative to plastic pails. The Smart Pail's modern design consists of a cube-shaped, semi-rigid, flexible vacuum-formed plastic liner with the option of a hermetically sealed lid and/or snap-on plastic cover, corrugated box and corrugated lid.

CDF has the industry's most comprehensive selection of drum and pail liners and accessories. Our products range from tough, leak-proof, [vacuum-formed inserts](#), to economical, [round-bottom liners](#) to the special protection of [barrier-film liners](#). These liners and inserts can be used with many chemical applications, such as adhesives, automotive, coatings, detergent, greases, ink, lubricants, paint, sealants and soap.

The [Cheertainer](#) is an environmentally-friendly alternative to traditional packaging. Its unique form-fit [bag-in-box](#) design minimizes packaging requirements and maximizes transportation and storage efficiency, providing an eco-smart solution.

**About CDF Corporation**

[CDF](#) Corporation is a privately held international company that specializes in the manufacture and sale of high quality pail, drum, intermediate bulk container and bag in box liners and flexible packaging. CDF manufactures products ranging in sizes from 2 ounces to 330 gallons in its Plymouth, Massachusetts ISO certified facility. Our unique products satisfy a variety of markets and applications including the food and beverage, chemical and cosmetic industries. [www.cdf1.com](http://www.cdf1.com)
