

worldwide innovator in flexible liquid packaging

FOR IMMEDIATE RELEASE

CDF Corporation improves the IBC Form-Fit Liner

Plymouth, MA, April 15, 2013 - CDF Corporation, a leading manufacturer of [drum](#), [pail](#), [intermediate bulk container](#) and [bag in box liners](#) and [flexible packaging](#), has created a customer benefit by modifying the IBC form-fit liner to include holes in the perforated flaps.

The CDF engineering team strategically added holes to the perforated flaps of the [IBC form-fit liner](#) to help hold the liner in place during filling; by keeping the liner squared, these flaps make fills easier. Once the IBC form-fit liner is filled, the flaps can be detached and used with a winder for dispensing. CDF was the first flexible packaging manufacturer to add holes to the perforated flaps to a number of customized applications. This feature is now part of all of CDF's stock IBC form-fit liners.

Form-fit IBC liners provide high performance in critical applications, such as top-fill applications using a bridge or automated filler; containers with no access doors for placing a liner at the bottom; high speed fills and viscous products that would get caught in the folds of pillow-shaped liners.

Typical form-fit liner markets include chemicals (adhesives, automotive lubricants, automotive oils, chemicals, coatings, concrete drilling additives, detergents, inks, paints, polymer emulsions); cosmetics (conditioner, cream, lipstick, liquid makeup, lotion, mascara, shampoo); food and beverage (concentrated fruit, edible oils, fish oil, fructose, jams, liquid egg, malts, molasses, pastes, sweeteners, syrups, vinegar, juice, wine); and pharmaceutical.

About CDF Corporation

[CDF](#) Corporation is a privately held international company that specializes in the manufacture and sale of high quality pail, drum, intermediate bulk container and bag in box liners and flexible packaging. CDF manufactures products ranging in sizes from 2 ounces to 330 gallons in its Plymouth, Massachusetts ISO certified facility. Our unique products satisfy a variety of markets and applications including the food and beverage, chemical and cosmetic industries. www.cdf1.com
