

worldwide innovator in flexible liquid packaging

FOR IMMEDIATE RELEASE

Unique 3" Discharge Assembly for Fast Dispense from Plastic Knock Down IBCs

Plymouth, MA, March 10, 2010 – CDF Corporation, a leading manufacturer of [drum](#), [pail](#) and intermediate bulk container liners and [flexible packaging](#), introduces a new 3 inch discharge assembly designed for collapsible, plastic [intermediate bulk containers](#).

The 3 inch discharge assembly consists of a 3 inch gland with membrane, a plug, a membrane cutter and a fitment adaptor. The membrane cutter is stored inside the fitment for easy access. The 3 inch fitment can be sealed onto any CDF form-fit liner. The fitment adaptor is attached to the 3 inch fitment and clipped into the dispense opening. Once the membrane is cut, the product is ready for dispense.

The clips on the discharge assembly allow the fitment to be attached directly onto the bin resulting in a secure and sturdy dispense. Standard 3 inch fitments have no way of attaching onto a bin, resulting in poor dispense fitment location which causes difficulty during product dispense.

"This 3 inch discharge assembly offers a superior solution for dispensing viscous liquids in collapsible totes," stated CDF IBC Accounts National Sales Manager Phil Lanier.

The 3 inch discharge assembly is one of many innovative products for flexible packaging offered by CDF. Other flexible packaging innovations have included the [Cheer Pack®](#), [Cheertainer® bag-in-box](#) and [Air-Assist™ IBC liners](#).

About CDF Corporation

[CDF](#) Corporation is a privately held flexible packaging company that leads the U.S. market in liners for industrial containers and custom packaging solutions. Since its inception in 1971, the company has maintained an entrepreneurial approach to industrial packaging, manufacturing and promotion. CDF manufactures products ranging in sizes from 2 gallons to 330 gallons in its Plymouth, Massachusetts ISO certified facility. www.cdf1.com
