

worldwide innovator in flexible liquid packaging

FOR IMMEDIATE RELEASE

***State-of-the-art Showroom Profiles Unique Bag-in-Box Solutions***  
Hands-on Packaging Filler Provides Experience for Customer

Plymouth, MA, May 14, 2009 – CDF Corporation, a leading manufacturer of drum, pail and intermediate bulk container liners and flexible packaging has opened a new, state-of-the-art filler showroom to showcase its successful bag-in-box product, [Cheertainer®](#). The new showroom will offer CDF customers an exceptional opportunity to try out both fully automatic and semi-automatic filling equipment as part of CDF's "Commitment to Solutions" initiative. The initiative also includes product training, customized sourcing and manufacturing for CDF's form-fit, bag-in-box gusseted designs.

"Our investment in an industrial showroom demonstrates our commitment to being a complete solution provider for our customers' [flexible packaging](#) challenges," commented Iris Kennedy, Cheertainer Product Manager. "In addition to manufacturing a full line of industrial and retail packaging products, CDF Corporation now has the ability to demonstrate how customers might fill our Cheertainer product using standard equipment."

The filling equipment currently on display is supplied by Flexifill Ltd., and is available in fully automatic and semi-automatic options. A fully automatic filler can fill up to 1,000,000 units per year and a semi-automatic filler can fill up to 500,000 units per year. The machines have the ability to run multiple sizes, and occupy a relatively small space compared to comparable filling equipment. These state of the art fillers are very user friendly; easy to clean, maintain and sterilize.

The showroom also highlights the Cheertainer - a form-fit, square, [bag-in-box](#) product that provides an eco-smart choice for food and beverage, chemicals, detergents, creams and lotions, inks, paints and coatings applications. The design of the Cheertainer is ideal for clean filling and full dispensing of a wide range of products. The bag creates a significant cost-saving opportunity with reduced plastic consumption and packaging requirements that yield transportation and warehousing efficiency.

**About CDF Corporation**

[CDF](#) Corporation is a privately held flexible packaging company that leads the U.S. market in liners for industrial containers and custom packaging solutions. Since its inception in 1971, the company has maintained an entrepreneurial approach to industrial packaging, manufacturing and promotion. CDF manufactures products ranging in sizes from 2 gallons to 330 gallons in its Plymouth, Massachusetts ISO certified facility. [www.cdf1.com](http://www.cdf1.com)
