

Lids

Drum and pail exterior lids protect the outside of steel drum and pail covers from external contamination and moisture. Interior lids protect the inside of steel drum lids from contact with lading in the drum.

Benefits

Exterior Lids

- Tough, reusable protection for pails and drums
- Designed to withstand the rigors of palletizing and outside storage (drums only)
- Keeps drum covers dry to reduce rust formation
- Clear and gray drum lids include UV screen to prevent solarization; black drum lid is already stabilized
- Clear lids allow cover labels to be read easily

Interior Lids

- Keeps stored product from contact with steel drum cover

Lids

Exterior lids provide snap-on protection for drum and pail covers. Heavy-duty models withstand even the most aggressive palletizing and similar abuse.

Interior drum lids prevent your product from coming in contact with the inside of metal drum covers. Standard and anti-stat models are available. Interior drum lids can be pre-punched to fit 2 x 2 bung openings.

Multiple Sizes

Exterior lids are available for 5 gallon steel or plastic pails and 55 gallon steel drums.

Interior lids are available for 55 gallon steel drums.

Material Choices

All drum and pail lids are made in America.

Low-density polyethylene is intended for general use and provides superb tensile strength, as well as high resistance to tears and flex cracking.

Anti-stat contains an internal anti-stat agent to aid in the reduction of static build-up, thus reducing dry chemical static cling and chance of ignition of flammable materials.
